Sector benefits

A corporation's ability to respond quickly and effectively to emergencies and other time-sensitive situations can have a major impact on employee and customer safety, business continuity, corporate brand reputation, liability and regulatory exposure, revenues, and other critical business factors. These emergency situations go well beyond disasters, but can include incidences such as fires, hurricanes, violent acts and chemical spills. Critical Response Notification Systems (CRNS) are an important and fast emerging category of IT solutions that address the vital need of organizations and communities for reliable, real-time communications and coordinated action in a crisis.

REACT! Enterprise™

REACT Systems, Inc.™, the innovator and leader in delivering global Critical Response Notification Systems (CRNS) that unify critical actions in emergencies and time-sensitive situations. REACT simultaneously delivers targeted event, location and recipient-specific verifiable communications, such as rich audio/video, SMS text and voice alerts to first responders and those at risk. As a fully scalable, client-server, enterprise solution, REACT can reach millions of users within seconds. The REACT open architecture enables interoperable automated communication with other systems and interagency coordination to reach anybody, anywhere, during crises.

- Targeting messaging to employees, safety personnel, and visitors based on location, recipient & responsibility
- Delivering multiple & simultaneous audio, image, voice & text alerts within seconds
- Supporting manual & automated global alerts launched from wired or mobile platforms, through integration with access control and other systems
- REACT! Enables companies to become more successful by reducing risk, lowering

Why choose REACT?

REACT Systems™, Inc. is the innovator and leader in delivering global Critical Response Notification Systems (CRNS) that unify vital actions in emergencies and time-sensitive situations. REACT enables health care providers, educational institutions, public safety agencies, facility operators and corporations to dramatically improve Critical Response Performance (CRP)SM by assuring incident readiness and real-time, coordinated response. REACT Systems was formerly known as Vasona Technology, Inc.
