

Healthcare Solutions

Did you know...

- 7,569 hospitals in the U.S. with 850,000 staffed beds
- 4,422 emergency rooms in the U.S.
- A 2006 study found that medication errors harm at least 1.5 Million people every year
- In 2006, 25% of health facilities were completely compliant with the HIPAA Security Rule

Sector benefits

Emergency preparedness and patient safety are top priorities among health care executives managing America's 7,569 US hospitals and other health care institutions. According to a survey of health care CIOs, conducted in 2006 by the Healthcare Information and Management Systems Society, implementing technology to reduce medical errors and promote patient safety topped the list of current priorities. Critical to patient safety is the need for emergency preparedness and quick, effective response to issues and incidents such as CODE alerts, fires, criminal activity and other natural and man-made disasters. Critical Response Notification Systems (CRNS) are an important and fast emerging category of IT solutions that address the vital need of hospitals and health care institutions for reliable, real-time communications and coordinated action in a crisis.

REACT! Enterprise™

REACT Systems, Inc.™, the innovator and leader in delivering global Critical Response Notification Systems (CRNS) that unify critical actions in emergencies and time-sensitive situations. REACT simultaneously delivers targeted event, location and recipient-specific verifiable communications, such as rich audio/video, SMS text and voice alerts to first responders and those at risk. As a fully scalable, client-server, enterprise solution, REACT can reach millions of users within seconds. The REACT open architecture enables interoperable automated communication with other systems and interagency coordination to reach anybody, anywhere, during crises.

- Delivering critical alerts instantly via:
 - Computer desktops
 - Hallway monitors
 - Pagers
 - Televisions
 - Phones
- Dramatically improving emergency response and outcomes in these situations
- Alerts launched from wired or mobile platforms, or automatically through integration with access control

Why choose REACT?

REACT Systems™, Inc. is the innovator and leader in delivering global Critical Response Notification Systems (CRNS) that unify vital actions in emergencies and time-sensitive situations. REACT enables health care providers, educational institutions, public safety agencies, facility operators and corporations to dramatically improve Critical Response Performance (CRP)SM by assuring incident readiness and real-time, coordinated response. REACT Systems was formerly known as Vasona Technology, Inc.
