

Transportation Solutions

Did you know...

Air:

- There are more than 9,000 flights each year and 612 million passengers carried annually by U.S. commercial airlines
- Each year there are 31 airplane accidents & emergencies

Rail:

- There are 1,695 billion tons of cargo valued at \$2.4 trillion transported by rail in the U.S.
- \$150 million was granted for freight rail, passenger rail, and transit security

Road:

- Commercial trucking handles 70% or all commercial freight, valued at \$761 billion annually
- \$11,640,000 was allocated for the Trucking Security Bus Grant Program
- Each year there are 336 HAZMAT incidents involving commercial motor vehicles

Maritime:

- There are 326 official ports of entry in the U.S
- 9 million containers of cargo enter US ports annually, carrying 400 million tons of goods
- \$2.03 billion was allocated for port security in 2006

Sector benefits

Including airlines, mass transit systems, railroads and shipping ports, transportation is a critical industry in the world economy, and one that requires increasing levels of emergency preparedness. Nearly 660 million passengers flew on more than 10 million flights US airlines in 2006 and some 32 million Americans ride trains, buses and subways on an average day. In addition, more than 13 million containers will be shipped into the United States in 2007 from foreign ports. Concerns about sabotage and terrorist attacks are leading transportation and public safety officials to adopt new measures and technologies to protect citizens. Critical Response Notification Systems (CRNS) are an important and fast emerging category of IT solutions that address the vital need of organizations and communities for reliable, real-time communications and coordinated action in a crisis.

REACT! Enterprise™

React Systems offers the industry's most comprehensive, flexible, standards-based and easily deployable solution for instantaneously notifying, directing and coordinating all parts of the emergency response chain to over five million users with 99.9% availability. Critical Response Notification Systems (CRNS) address the need for improved Critical Response Performance by enabling new levels of preparedness, automation, speed and effectiveness through increased intelligence and integration across existing emergency alert systems and multiple modes of communications. REACT! Enterprise can be launched from desktops, telephones, wireless devices and/or automatically triggered through integration with leading security systems and enables:

- Audio, video, and text alerts delivered instantly, in any language

- Multiple, simultaneous alerts
- Targeted messaging to staff, patients, and visitors based on location, recipient, and responsibility
- Central or remote control
- Alerts launched from wired or mobile platforms, or automatically through integration with access control

Why choose REACT?

React Systems is at the forefront of CRNS innovation, enabling health care providers to assure incident readiness and real-time response for threat or crisis containment. The REACT! Enterprise solution is the industry's most comprehensive solution for notifying, directing and coordinating all parts of the emergency response chain. No other solution provider has the same level of functionality, scalability, security and adaptability as well as fast, easy and cost-effective deployment as the REACT Systems solution.
